More safety in parcel delivery

Securikett takes another step towards sustainability and expands its ecologically friendly product portfolio

Paper-based recycling revolution – the Securikett PaperStripe

In addition to the already well-known paper-based security labels and adhesive tapes with VOID effect, the PaperStripe seals have now joined the range of sustainable paper products. The PaperStripe closing seals work similar to the PaperLock security tapes and are suitable for smaller cardboard boxes. Due to the paper-based material of the seals, the packaging including the label can be recycled together.

This is an easy-to-use solution for shipping cartons which are manually or automatically taped and where tamper evident protection is needed. Tamper evident paper seals are in use for sealing cardboard folding boxes to protect against unauthorized removal, replacement, or tampering of contents.

In use & availability

These paper seals are one of our security solutions for online shops. When the seal is peeled or removed a distinct, colorful, and clear VOID effect appears. The closure seals are available as a generic “off-the-shelf” product, or they can be fully customized according to your company design, including logo, and are available in many striking colors.
